KENTUCKY REPUBLICAN PLATFORM.

We are opposed to the free and unlimited export of silver, believing that it would involve the country in financial ruin. We believe in a sound currency and in the use of both gold and silver coinage, provided that the dollar is made practically as valuable as a dollar in the other.

We favor a tariff as regulated to protect the interests of all classes, and we would open up to the tariff and to home products, thus insuring good wages to the laborer and a home market for the producer, and in connection with this we favor the re-establishment of the duties of reciprocity. We believe that such a system will bring every Government enterprise, agricultural, industrial, or otherwise, to its proper place, and we believe that it will bring to the rear the entire economic system, thus insuring the currency. In case of the post-ponement of the Democratic party, the devotion to the old debt system and wild cat tendencies, we believe that the Republican party can be more safely trusted to regulate the financial system of the Nation.

We favor an American policy which will protect American and American interests in every part of the world at all hazards and will sympathize with struggling Republics rather than support monarchies.

Uncle Sam's Shortage.

The deficit in the National Treasury for the first 30 days of the present fiscal year is \$12,612,281.

We have expressed our desire on the National race, now let Mason come say something.—Vanderburg Sun.

Just now Mason is busy; she has started in on saving her 80th cent of wood; but when the Convention is called to meet at Vaneburg, we'll call around, put our feet under your magnolia, and talk the matter over.

DURING the fiscal year ended June 30th, 1905, the merchandise exported from the United States was \$57,930,261; last year, \$60,197,799. Merchandise imported \$71,900,319, of which about half was free of duty, year, \$61,775,917, of which \$37,575,917 was free of duty. These figures show, in language stronger than any that can be uttered by mortal man, just how the Free-trade Tariff is working—we buy more goods from Europeans and sell less to them than we did under the McKinley Law. Oh, how the Democratic Tariff was going to open to the American farmer and manufacturer "the markets of the world."

The advertising columns of The Ledger speak for themselves. They show that people who know how to advertise know also when to advertise.
